PROFESSIONAL SUMMARY

Final-year B.Tech Computer Engineering student (Indus University, 2026) with hands-on experience building full-stack web applications. Developed **InvHub** — a multi-tenant SaaS Inventory Management Platform using the MERN stack with JWT auth, role-based access control, and REST APIs. Seeking a **Full Stack Developer / MERN Stack Developer** role to contribute to real client-facing projects from day one.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs

Auth & Security: JWT, bcrypt, RBAC

Concepts: Multi-Tenant Architecture, CRUD, State Management

Frontend: React.js, Tailwind CSS

Databases: MongoDB (Atlas), Mongoose, Firebase Firestore

Tools: Git, GitHub, VS Code, Postman

Soft Skills: Problem Solving, Communication, Teamwork

EXPERIENCE

Web Development Intern · Helsy Infotech Pvt. Ltd.

Dec 2024 – Dec 2024

- Built responsive web pages using **HTML5, CSS3, JavaScript, and Bootstrap 5**.
- Identified and resolved UI/styling issues across browsers and screen sizes.
- Used **Git and GitHub** for version control, code tracking, and project management.
- Gained exposure to frontend workflows converting design requirements into functional interfaces.

PROJECTS

InvHub – Multi-Tenant SaaS Inventory Management Platform

github.com/abhirajsinh27/invhub-restaurant-saas

React.js · Node.js · Express.js · MongoDB Atlas · Tailwind CSS · JWT

- Architected a **multi-tenant SaaS platform** with organization-based data isolation — each restaurant/business gets an auto-generated unique code; all data is scoped by **organizationId** ensuring zero cross-tenant data leakage.
- Implemented **JWT authentication with Role-Based Access Control** (Admin / Staff), protected API routes, and secure httpOnly token handling.
- Built 15+ **RESTful API endpoints** (Express.js) for product CRUD, category management, stock tracking, and activity history logging, all scoped per organization.
- Designed an **analytics dashboard** with real-time low-stock alerts, inventory trend summaries, and activity audit logs using reusable React components.

FreelancerHub – Role-Based Freelancer Marketplace

github.com/abhirajsinh27/Freelancer-Hub

React.js · Firebase Auth · Firestore · JavaScript · Tailwind CSS

- Built a full-featured marketplace with two user roles — **Clients** post projects and **Freelancers** submit bids — each with separate dashboards.
- Implemented **Firebase Authentication** for secure email/password login and **Firestore real-time listeners** (onSnapshot) for live bid and project updates.
- Designed fully responsive UI using React component architecture with conditional role-based rendering.

SportsEra – Sports & Esports Event Management Platform

Team Project · Final Year

HTML5 · CSS3 · JavaScript · PHP · MySQL

- Contributed to frontend development by building responsive UI layouts, navigation components, and event listing pages using HTML5, CSS3, and JavaScript.
- Assisted in implementing user registration, login functionality using **PHP sessions**, and event participation features with **MySQL** integration.
- Worked in a 3-member team to develop and integrate frontend and backend modules while using Git for version control.

EDUCATION

B.Tech – Computer Engineering

Indus University, Ahmedabad

CGPA: 8.4/10

2022 – 2026

HSC

Delta School, Upleta

2022

SSC

Noblehood School, Upleta

2020
